

10 Reasons Why Digital Signage Networks Choose NOXELs XTREAM Solution

1 – Lowest TCO

NOXELs proprietary Xstream media players have no moving parts, and run off embedded firmware. They'll run reliably for years, and are maintenance-free.

2 – Flexibility

Customers can choose Software as a Service or Enterprise options.

3 – Sophistication

Web-based layout, planning and scheduling tools allow operators to design and manage networks of any size.

4 – Plug and play

Deployment is fast and requires zero on-site IT skills.

5 – Remote control

Updates, upgrades and device management is all done from a browser. Your office in Spain can control your devices in Peru, seamlessly.

6 – Secure

Move content around securely and control user access with role-based rights.

7 – Friendly

Training requirements are minimal for an intuitive user experience.

8 - Powerful

The NXDS600 is the only solid state media player on the market that supports both Blu-Ray-level 1080P HD and ALL types of 3D video

9 – Customizable

Operators can "skin" the look and feel of the user experience to match their corporate look

10 – Green

Our media players consume just 5 watts of energy, which is good for the Earth and the bottom line.

NOXEL's Xstream Series digital signage players are paired with the Noxel NXCM Content manager platform to create a powerful, perfectly-paired total solution for any network operator who needs flexibility and reliability, and Blu-Ray HD quality video output.
